HANDY-JOG PAPER JOGGER

Print matters.
Every detail counts.

Printing means more today precisely because people are printing less. Every piece that gets printed carries more weight because choosing print has become an intentional decision.

When a customer chooses print, they are choosing something tangible, something meant to be held, noticed and remembered. That is **The Prestige of Print**. Every finished piece reflects the craftsmanship of your people, the standards of your shop and the reputation you've built.

EVERY LASTING IMPRESSION STARTS WITH THE RIGHT TOOLS.

For over 150 years, Challenge has built tools for printers who believe craftsmanship still matters. Inspired Innovation refined over generations puts that experience to work for craftsmen who hold every finished piece to a higher standard.

American Engineered. Michigan Made. Original Ownership. Together, they represent generations of people, knowledge and craftsmanship behind the tools on your floor, and a commitment to the people who count on them every day.

THE TOOLS CRAFTSMEN COUNT ON.

Your craftsmen know that quality depends on getting every step of the process right. Properly aligned stock creates the foundation for the clean, consistent results your customers expect.

The Handy-Jog keeps stock aligned and ready for the next step in a compact footprint. Its simple, reliable design keeps your people focused on the work instead of managing equipment.

Front-side loading keeps material moving naturally, while optional tray configurations and an optional Instant-On footswitch for hands-free operation let your craftsmen tailor the Handy-Jog to the needs of your shop.

Your people will take pride in every piece they finish.
