

PT 335A Plus Multi

CREASE • PERF • SCORE

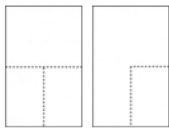

The PT 335A Plus Multi combines all the same features and versatility as the PT 335B Multi and more. Added strike perforation capabilities means the PT 335A Plus Multi can complete partial perforations in both directions in a single pass. Equipped with interchangeable creasing/perfing die capability, the PT 335A Plus Multi can quickly switch over from perfing to creasing while preventing digital toner cracking. With the Progressive Crease function activated, each sheet is creased in a slightly different position, creating a "V" shape that forms a square back when the book is assembled, allowing it to lay flat after stapling. The Perfect Bind Cover mode is a user-friendly feature that calculates the crease positions for spine and hinge scoring based on operator input.

FEATURES

- Multi accessory output
- Adjustable crease/perf dept control
- Interchangeable crease/ perf dies
- Strike perf capabilities for "box" or "T" perfs
- Partial perfs in both directions in one pass

Partial Perf

Interchangeable Die Tool

SPECIFICATIONS
